Epergne

Word Count: 1,015

The Impact of the Epergne

(Bisson). Lastly, the third most known glass epergne was called the carnival glass epergne.

Bisson described this as “glass objects using iridescent glass.” (Bisson). These are some of the many variations of how epergnes evolved throughout the 1700s and 1900s.

Epergne vases were invented in the early 1700s. Britannica supports this by writing, “The earliest record of an epergne is in 1725, and extant pieces date from the 1730s.” (Brittanica).

They emerged from France and spread throughout the rest of Europe. They became famous when these vases were used for Queen Victoria’s ascension to the throne. In other words, Minsker

\$300 to higher than \$7,000. This price clearly shows its value, importance, and rareness among the people. Not only is the antique valuable because of the gold and silver material it is made from, but also because of how it has impacted and influenced people all around the world.

A popular known epergne is the Rayburn Epergne. To let the readers imagine the vase,
